

Gallery Problems Solved...Almost

Contributed by Chris Nuttall
Saturday, 14 June 2008

I finally have the problems with the Gallery sorted out, and it is back up and running again. The links in the Main Menu work. However, any direct links (like in the Chase Logs) do not work. I'm in the process of updating those, and they will be working again shortly. There's still a weird graphical thing (at least for me) with the expanding submenus. It doesn't seem to affect functionality...it just appears aesthetic, so I'm going to leave it alone. I'm afraid I'll mess something up else and won't be able to fix it.

Anyway, now that things are working normally again, I'll be on the process of updating the site from my chase vacation at the end of May. I know it's a bit late, but I work for a living after all.
